**Opening Day In-person Viewing: APR 17 | NOON-5PM (Drop-in)**

**Opening Reception: APR 17 | 6-8PM (Masks are required in the building at all times)**

From climate change to racial climate, Organic Destruction consists of artworks that provide direct commentary on how human intervention effects the environments in which we live. By tracing the values, philosophies, and actions of humans, we find direct correlations to these issues and begin to ask the right questions as a means to enact change. This exhibition investigates the many facets of our ecosystem that play a part in the human condition and the world around us.
